MAIL BID LIST #12
CLOSING APR - 2 1986

MASTER

A good selection of British Commonwealth items can be found here including the British Honduras 1/4 Rial noted. Others are from the West Indies, Africa, Middle and Far East and the Pacific. Rarities are here among the in-depth listings of Chile, France, Germany, Mexico, Portugal and in the Transportation Tokens. Tokens from the Cape Verde Islands, Madeira, Greenland, Romania and Portuguese Casinos enhance the list. Good hunting!

Lot descriptions are of necessity brief and oriented to numismatists. Sizes are usually in millimeters, although larger paper pieces are often in inches. Tokens are round unless otherwise indicated. Materials are shown as Al, Br, Cop, Nkl, Ir, Zn or Pl(astic). When parentheses are used it means that the information enclosed is not in the token legend or describes some device on the token. Catalog numbers are often used to aid description, e.g. (L#101.3) and refer to the most standard U.S. work on the topic at hand. Since listing each reference would be too cumbersome, please write if you need to know which. Dollar values written simply (\$5) mean a suggested bidding range. An MB enclosed with a dollar value in parentheses (e.g. (MB\$25)) means a "Reserve" or "Minimum Bid". Grading can be only approximate in a series as varied as tokens. I try to be conservative and in most cases have reduced items by one grade where there is any question in my mind.

From time to time more than one specimen of a lot is submitted on consignment. This happens with less than 10 lots, and mainly on items selling under \$10. Rather than list each such item, I will offer the other specimen at the winning bid price if it is the same grade and the second bid is within 10-15% of the top. If the grade is lower, the price will be adjusted. You are under no obligation in such a case. Comments on my listings and methods of operation are always welcome. (see Late Listings)

MAIL BID LIST #12

Prices Realized

The highest prices continued to be paid for european colonial tokens with a sustained interest in British Commonwealth items. Latin America tokens maintained their usual strong interest at moderate buying levels, as well as tokens from France and Germany. Interest in Portugal and colonies dropped on this sale due probably to high minimum bids. Scarce transportation tokens drew considerable interest.

Lots not listed received no bids ore else bids were too low for consideration. Sales prices are given in amounts rounded to the nearest dollar although in many cases actual bidding was above or below that amount by fractions of a dollar. Figures in parentheses are the number of bidders for any given lot.

operated in colonial areas had
european addresses on their

JERRY F. SCHIMMEL

POST OFFICE BOX 40888
SAN FRANCISCO, CALIFORNIA 94140
U.S.A.

Even though the legend on this token says Belize, Honduras, it could easily be mistaken for a Patriotic U.S. Civil War token. In 1871 there were no doubt still a lot of die patterns left over, and a number of them were used for firms in the Caribbean. Besides the still unknown J.J. who issued this rare 1/4 Rial piece, the Asturias sugar mill in Cuba and the Francisco Suarez coffee plantation in Guatemala had strikingly similar pieces made up at about the same time.

The token here was described in detail by Major Fred Fridmore in England in the 1960's. It is a rare piece from a small Central American nation from which coin issues have always been few. No longer British Honduras, the modern country at the southern tip of Mexico has taken the name of the capital city mentioned on the token. (See Lot #15)
